PROFESSIONAL SUMMARY

Full-Stack & AI Engineer with **9 years of professional software engineering experience**, combining robust backend architecture (Laravel, Python, Node.js) with hands-on AI agent engineering. Proficient in designing scalable RESTful APIs, agentic coding workflows, and local developer toolchains (Claude code, codex, Ollama, Continue.dev). Proven track record in optimizing application performance, managing cross-functional teams, and integrating local and cloud-based Large Language Models into enterprise applications.

Core Skills:

- **AI & Agent Engineering:** AI Agent Design, Local LLMs (Ollama, Llama 3, Mistral), Claude API, Continue.dev Integration, Prompt Engineering, Model Evaluation & Fine-Tuning
- **Backend & API Development:** PHP (Laravel, CakePHP), Node.js (Express), Python (FastAPI, Flask), Microservices, RESTful & SOAP APIs
- **Frontend Development:** Vue.js, JavaScript (ES6+), HTML5, CSS3, jQuery
- **Databases & Cloud:** MySQL, MSSQL, MongoDB, GCP (Storage, Logs, Scheduler), AWS (S3)
- **DevOps & Developer Tools:** Docker, Git, OpenAPI/Swagger, CI/CD Pipelines, Postman
- **Methodologies:** Agile/Scrum, Sprint Planning, Code Reviews, Documentation

AI ENGINEERING & LOCAL AGENT SETUP Custom Local AI Agent Infrastructure & Workflow:

- **Local LLM Orchestration (Ollama):** Deployed and managed local LLMs (e.g., Llama 3, CodeLlama) via Ollama for offline code generation, privacy-compliant data processing, and rapid prototyping.
- **Agent System Design (Claude code, Codex & Anthropic API):** Built multi-prompt agent workflows leveraging Claude/Codex for complex code refactoring, architecture design analysis, and natural language query processing over structured databases.
- **IDE Agentic Integration (Continue.dev):** Configured and customized Continue.dev extensions within VS Code/JetBrains to enable context-aware autocompletion, automated unit test generation, and seamless local model switching.

- **Contextual Retrieval Architecture:** Configured custom `.prompt` files, rulesets, and codebase embeddings to feed relevant project context directly into local AI agents, drastically boosting development velocity.

PROFESSIONAL EXPERIENCE:

Software Product Developer Spiderhook Inc. - Ortigas Pasig City, Philippines June 2024 - Present

- Led full-stack development of internal web platforms using **Laravel (backend)** and **Vue.js (frontend)**.
- Architect scalable software solutions, managing both client-facing features and server-side logic.
- Oversee all phases of the software development lifecycle — from requirements gathering to deployment and maintenance.
- Manage cross-functional teams and coordinate project timelines, ensuring on-time delivery and alignment with business goals.
- Implement RESTful APIs, database models, and user interfaces with a focus on performance and usability.
- Maintain project documentation, conduct code reviews, and facilitate agile workflows (scrum/ sprint planning).
- Collaborate with stakeholders to translate business requirements into technical specifications.

Key Impact: Reduced API response time by ~30% through query optimization and caching strategies.

Web & Application Developer Petnet Inc. - Makati City, Philippines March 2021 - June 2024

- Developed and maintained enterprise web applications using **Laravel** and **Vue.js**.
- Integrated third-party APIs for internal tools and external client services..
- Led version upgrades of legacy systems from **.NET to Laravel**, ensuring system stability and data integrity.
- Collaborate with business analysts and developers for software design.
- Perform upgrades to enhance security and efficiency.

Key Impact: Streamlined deployment workflow by introducing Docker-based local setups, improving team efficiency by 40%

Additional Role: Project Management Officer (PMO) - October 2023 - March 2024

Assigned Temporarily

- Assumed PMO responsibilities to ensure continuity in project tracking and stakeholder coordination.
- Facilitated sprint planning, backlog grooming, and project status reporting,
- Maintained documentation, timelines, and task assignments to ensure deliverables were met.

Mid-Level Programmer Doña Alejandra Incorporated – Quezon City, Philippines September 2019 – March 2021

- Led a team in developing web-based applications and maintaining existing ones for clients.
- Participated in software architecture, client consultations, and post-launch support.
- Demonstrated understanding of projects from client and business perspectives.
- Collaborated with business analysts and developers for software design.
- Performed upgrades to enhance security and efficiency.

Junior Programmer Doña Alejandra Incorporated – Quezon City, Philippines October 2017 – September 2019

- Developed and maintained web applications using **CakePHP**, HTML, JavaScript.
- Assisted in QA, testing, bug-fixing, and technical support.
- Coordinated regularly with project leads and senior engineers.
- Maintained and improved software performance.

EDUCATION:

Bachelor of Science in Information Technology World Citi Colleges Antipolo Campus, Philippines S.Y 2010-2014
